

ABSTRACT OF THE DISCLOSURE**THIRD PARTY REGULATION OF CALLS THROUGH A PARTICULAR LINE BASED
ON A CALL CONTEXT**

A method, system, and program for third party regulation of calls through a line based on a call context are provided. Third party regulation criteria identify individuals who are regulated for calling into or receiving calls from a particular line. For each call received at the line, the identity of the caller is detected. For each call placed from the line, the identity of the callee is detected. Then, the call is regulated according to the relevant third party regulation criteria, such that a third party is enabled to regulate all calls from or to a particular line without being a direct party to the calls.
